SAFETY MAGAZINE DEVOTED TO SHIPS, SUBMARINES AND DIVING

STORY IDEAS

SPOTLIGHT ON TEAMWORK

WHO'S GOT YOUR BACK? Creating a culture of teamwork on a ship, sub, or underwater requires trust and understanding. When a daily routine turns into a crisis, would you know what to do to protect yourself and your shipmates? Do you have the right mindset to assess the risk and gain control of the situation?

TIME-CRITICAL RISK MANAGEMENT

WHEN TIME IS NOT ON YOUR SIDE. Time-critical risk management is comprised of these three levels: deliberation, management, and decision making. It begins with a wide start-up and narrows to the pointy end. But, when time is not on your side, and you get to the time-critical decision making, you have to rely on your experience, knowledge, and ability to get it all together with little time.

LEADERSHIP / MENTORSHIP

ARE YOU A GOOD LEADER? If you have what it takes to lead your shipmates to embrace a culture of teamwork, know what you need to be a good one. Mentorship plays a big role in guiding the young members of our armed forces to become good leaders. A good leader knows when to let go and trust that the person he or she trained can build a team of experts to get the job done.

DECISION-MAKING SKILLS

YOUR INSTINCT IS YOUR COMPASS. Anyone who reads this magazine has the innate ability to do the right thing when faced to choose between right and wrong. Whether you're deployed or moored, work continues top deck, below deck and underwater. Do everything in your power not to get caught up in the "everybody is doing it" attitude or peer pressure. Rely on the ABCD of risk management to do the right thing, even if it's the hardest thing to do.
